OWA	Opacifier and whitening agent	(1)	(1)

Note: The code of the chosen color may vary depending on the dye used in accordance with the Regulatory restrictions of each country.

(1) Please consult us for more information.

This palette serves to aid in color selection for the marketing of products delivered in capsule form. Please inquire if a preferred hue is not shown. Color customized development is available. Please consult us for more information.

The information contained in this document applies to all the Quali-V® product range.

Given that the Pantone color references contained within are for orientation and for reference purposes only, samples can be produced upon request to show true color application on vegetal (hypromellose) material.

These colours have been selected for inclusion in the product Pantone taking into account colorant stability during capsule manufacture and colorant acceptability in major Pharmaceutical European markets (however, a review by your regulatory department is recommended).
