

Nutra'V

Slow

Hard two-piece HPMC capsules for consumer healthcare applications

Delayed-release, plant-based capsule for the protection and delivery of beneficial ingredients

Qualicaps

Incorporating inherent delayed-release functionality into a capsule

Delayed Release

Clean Label

*Free of allergens, gluten, GMOs, preservatives, sugar

Easy to Swallow

Masks Taste and Odor

Manufactured in a cGMP
Compliant Facility

COMPOSITION

 Polymer
(Hypromellose)

 Gelling agent
(Gellan gum)

 Dyes (optional)

APPLICATIONS

- Acid-sensitive ingredients
- Reflux-prone ingredients
- Moisture-sensitive ingredients
- Probiotics
- Enzymes

DISSOLUTION PROFILE

Nutra'V Slow capsules are specifically designed to target moisture-sensitive and acid-labile ingredients by slowing down capsule rupture and release of contents.

MOISTURE CONTENT

≤ 6.5%

MAIN FEATURES

- Slow dissolving product, retarding the release of ingredients
- 100% plant-based; free of animal origin
- Meet the increasing clean-label demands of health-conscious consumers, as well as the specific dietary needs of vegetarians and vegans
- Coating-free capsule; there is no need to add chemicals, solvents or other external protection to enable its delayed-release capability
- Constant solubility in liquids over a broad range of temperatures, so products can be taken with either warm or cold drinks
- Band-sealing suitable for liquid fills to prevent against leakage and provide tamper evidence
- 3-year shelf life
- Diversity of size, color and printing options for differentiation in final product dressing
